Team Member Name		BALAJI PATIL]

1. Abstract

The Library Management System is a smart and efficient application designed to simplify and automate library operations efficiently. The primary objective of this system is to ensure easy book management, quick access to records, and effective handling of student and librarian activities while minimizing manual work and operational complexity. The system allows librarians to maintain book records, issue and return books, monitor due dates, and manage student information. It supports features such as search functionality, fine calculation for late returns, availability tracking, and user authentication. Additionally, it provides notifications and maintains transaction history for better management and transparency. By automating library operations and monitoring records digitally, the Library Management System reduces paperwork, improves efficiency, and enhances user experience. This project demonstrates the practical application of database management, web technologies, and software engineering concepts in solving real-world library management problems.

2. Module Mapping

(Provide details of how modules are divided among team members.)

Module Name	Assigned Roll Number(s)	Signature
Book Management	2520030505	P. SASI KUMAR
Issue / Return	2520030505	P. SASI KUMAR
Student Records	2520030505	P. SASI KUMAR
Fine Calculation	2520030505	P. SASI KUMAR
Search Books	2520030505	P. SASI KUMAR
Admin Panel	2520080065	BALAJI PATIL
Notifications	2520080065	BALAJI PATIL
Reports	2520080065	BALAJI PATIL
History	2520080065	BALAJI PATIL
Database	2520080065	BALAJI PATIL

Koneru Lakshmaiah Education Foundation

(Deemed to be University estd. u/s. 3 of the UGC Act, 1956)

Off-Campus: Bachupally-Gandimaisamma Road, Bowrampet, Hyderabad, Telangana - 500 043.

Phone No: 7815926816, www.klh.edu.in

3. Module Details

The Library Management System is divided into multiple integrated modules that collectively handle book management, issue and return operations, student records, fine calculations, and notifications. It provides efficient search functionality, maintains borrowing history, and supports report generation for analysis purposes. All functionalities are centrally controlled through an admin panel, ensuring efficient management and smooth operation of the entire library process.

4. Frameworks / Platforms / Software Used

HTML5, CSS3, JavaScript (ES6+), React.js, Node.js, npm, MySQL, REST APIs, Express.js, Axios, React Router, Context API / Redux, Bootstrap / Tailwind CSS

Guide Name and Signature (remarks if any) : Dr. NEELIMA GOGINENI
